SUMMARY

Results-driven Master's student with a bachelor's degree in Software Engineering from Kennesaw State University in Kennesaw, Georgia. Strong background in both technical and professional writing, as well as knowledge of SQL, PowerBI, Jira, and Microsoft Office. Strengths include excellent organizational skills, task management, integrity, and strong written and verbal communication. Seeking to contribute analytical and problem-solving expertise in a dynamic environment.

WORK EXPERIENCE

Newton County Schools

School Technology Assistant | 11 August, 2025 - 20 March, 2026

- Resolved 30+ daily hardware and software issues using IncidentIQ and Google Workspace while providing 40 hours per week of technical support in a high-volume environment.
- Collaborated with teachers and staff to troubleshoot technical challenges and increase effective classroom technology usage.
- Managed and audited inventory for 300+ Chromebooks, maintaining accurate records and improving asset tracking to support efficient resource allocation.

Kennesaw State University

Student Assistant | 10 January, 2022 - 24 July, 2023

- Maintained 100% training compliance using Excel and Percipio, which ensured accurate tracking and timely completion of required programs while supporting staff inquiries.
- Monitored and reported training progress across teams and strengthened organizational accountability.
- Developed audits for campus safety inspections using ETQ Reliance, increasing alignment with established standards to 80% and identifying key areas for improvement.

DailyCommune Publishing

Web Content Editor | 20 August, 2019 - 15 December, 2021

- Managed and updated 80+ product listings, ensuring accurate, well-organized, and user-friendly content that improved site usability and reduced content errors by 20%.
- Conducted research on product details and trends to enhance content quality.
- Collaborated with a 5+ member remote team to streamline workflows and maintain consistent branding across the website.

RELEVANT PROJECTS

Outty

Technologies: GitHub | [Jira](#) | Flutter | Firebase | [Figma](#) | 3 June, 2026 - 24 July, 2026

- Led the UX prototyping and user flow design for Outty, an adventure-based dating app, creating an interactive prototype to improve usability and engagement.
- Designed and iterated user-centered interfaces for core features while collaborating with the development team to streamline the user experience. | View Project: <https://outty-app-team-1.firebaseio.com/>
